12-core fiber optic tray specifications and models

Overview

Discover CommScope fiber splice trays, fiber optic splice trays, and a convenient fiber splice organizer.

Key Takeaways

A 12-core fiber optic tray is a compact, protective module designed to organize, splice, and manage up to 12 optical fibers efficiently in distribution and termination systems.Overview and Functionality

A 12-core fiber optic tray serves as a secure location to store and protect fiber cables and splices. It allows for the mounting of fiber splice protectors and management of excess fiber, ensuring proper bend radius and preventing damage during installation or maintenance . The tray can accommodate fusion splicing or mechanical splicing, and fibers can be connected directly to other cables or via pigtails to optical equipment .

Key Features
• Connector Compatibility: Some trays, like the FC/UPC 12-core model, are designed for specific connectors, providing low back reflection and stable connections .

• Material and Durability: Typically made from high-quality injection-molded plastics or aluminum, trays offer resistance to aging, temperature fluctuations, and mechanical stress .

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Space Efficiency: Stackable or modular designs allow high-density configurations in Optical Distribution Frames (ODF), patch panels, or termination boxes .

• Fiber Protection: Internal routing ensures the fiber bend radius exceeds 30mm, preventing macro-bending losses and maintaining signal integrity .

• Modularity: Many trays feature modular structures for easy expansion, adapter installation at oblique angles, and convenient labeling for splicing and distribution .
Applications
• Telecommunications: Used in central offices, metro networks, and long-haul transmission systems to manage fiber connections .

• FTTH/FTTB Networks: Essential for fiber termination in residential or commercial buildings .

• Indoor and Outdoor Use: Certain models, such as Corning's metal-based trays, are suitable for both indoor and outdoor splice closures, providing strain relief and environmental protection .
Installation and Operation

The incoming fiber cable is stripped of its outer jacket, and individual fibers are looped around the tray into splice holders. Splices are then performed either to outgoing cables or pigtails, which connect to other network equipment. The tray design ensures organized routing, easy access for maintenance, and protection against fiber damage .

Popular Models
• SJ-Module-1 12-core tray: Modular, lightweight, suitable for 19″ racks, with oblique adapter installation and convenient labeling .

• FC/UPC 12-core tray: Designed for telecom operators, stackable, and compatible with FC/UPC connectors .

• Corning M67-110: Metal-based, supports mass fusion or heat-shrink splices, suitable for indoor/outdoor closures . These trays are integral components in modern fiber optic networks, providing efficient, safe, and organized management of optical fibers.

Fiber Optic Tray 12 Cores

Each 12 Core Fiber Optic Tray provides space for mounting fiber splice protectors

12 Core Fiber Splice Tray

The optical fiber splicing tray is designed to provide a location for storing and

Fiber Optic Splice Tray SC/APC-12 Core for FTTH

It supports up to 12 fiber cores with SC/APC connectors, featuring angled

Fiber Optic Splice Tray FC/UPC-12 core Factory

This 12-core tray is specifically engineered to accommodate FC/UPC connectors, offering a robust solution for telecom operators and

ICC Fiber Optic Splice Tray Closure for 12 Fibers

Compatible with multimode (MM) and singlemode (SM) fibers. Recommended for securing and protecting

12 Core FTTH Fiber Optic Splice Tray

The splice tray is suitable for both single-mode and multimode fibers, providing flexibility in fiber optic

Q-Series Splice Tray, Fusion, 12-Fiber, Clear Transparent

The 12-Fiber transparent fusion splice tray is ideal for fusion splicing single fiber. The see through cover and mylar insert enable easy

Fiber Splice Trays & Wallets

Discover CommScope fiber splice trays, fiber optic splice trays, and a convenient fiber splice organizer. Organize fiber connections

Fiber Optic Splice Tray — 12/24 Core | TTI Fiber

Fiber optic splice tray for terminal boxes, patch panels, and splice closures. Available in 12-core and 24-core capacities with built-in

Fiber Optic Splice Tray — 12/24 Core Organizer | TTI

12 and 24 core fiber optic splice trays with integrated fiber routing guides and heat-shrink splice holders.

F-Tray-12

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

DESCRIPTION Splice tray is used in optical distribution frame, distribution box, and splice closures, which is engineered for use with

ICC Fiber Optic Splice Tray Closure for 12 Fibers

Description ICC''s Fiber Optic Splice Tray is designed to organize and protect fusion splices in structured cabling systems. This

Fiber Optic Splice Tray — 12/24 Core | TTI Fiber

Fiber optic splice tray for terminal boxes, patch panels, and splice closures. Available in 12-core and 24

12/24 cores Fiber Optic Splice Tray Splicing Cassette

About this item Fiber Management: High-capacity splice tray designed to accommodate 12 or 24 fiber optic cores, providing

ABS Material 12 Core Fiber Optic Splice Tray Fiber Tray Module in ...

The ABS Material 12 Core Fiber Optic Splice Tray Fiber Tray Module is a key component in optical distribution. Crafted from high -

Fiber Panels, Modules & Cassettes

Explore CommScope''s efficient and scalable fiber splice panels designed for seamless connectivity. Accommodating LC, SC, and

12 Core Fiber Optic Cable Specifications You Need to Know

In addition, the 12 Core Fiber Optic Cable supports multiple fiber mode specifications including OS2, OM1, OM2,

ofcn-013A 12 cores Fiber Optic Splice Tray

Amazon : ofcn-013A 12 cores Fiber Optic Splice Tray : Electronics Help others learn more about this product by

ODF Mini Optical Distribution Frame 12 Core SC/UPC

Product name Optical fiber Splicing tray Product Model 12 Core SC/UPC Port 12 Product Size 210*180*25

Optical / fiber optic 12 fiber splice tray

The splice tray can hold up to twelve fibers in a fiber holder as standard. The splice tray is suitable for the following fiber optic closure
