# ZITHA TECH SPECIALTY CABLES (Pty) Ltd

# Albanian waterproof distribution box model

## Overview

You get the rooftop unit, air distribution box, control box, and a wall thermostat in one matched system.

## Key Takeaways

The SHPN Series waterproof distribution boxes are widely used in Albania, offering IP66 protection, modular configurations from 4 to 36 ways, and durable ABS/PC construction suitable for indoor and outdoor installations.Key Features

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

Protection and Durability: SHPN Series boxes provide IP66 waterproof and dustproof protection, ensuring reliable operation in harsh outdoor environments. The impact resistance is rated IK09, protecting against physical damage. The boxes are made from ABS shells and PC doors, halogen-free and silicon-free, with temperature resistance from -25°C to +80°C and glow wire test up to 650°C, meeting IEC 60695-2-11 and UL 94 V-2 standards . Modular Design: These boxes are available in 4 to 36 module configurations, allowing flexible circuit arrangements. Each circuit is controlled by a breaker, ensuring safety and easy maintenance . Voltage and Current Ratings: Rated voltage is Un=400V, rated insulation voltage Ui=690V, and rated terminal current In=75A, suitable for most household and commercial applications . Installation Flexibility: Knockout holes on the top and bottom allow easy wiring customization. Smooth, flat surfaces can be ordered for specific installation needs. Recommended installation includes well-ventilated locations with good heat dissipation to prevent corrosion . Standards Compliance: SHPN Series boxes comply with EN 60670-1, DIN EN 60670-24, and other international standards, ensuring safety and reliability in electrical installations .

Additional Options

For applications requiring extreme environmental resistance, stainless steel distribution boxes from BARTEC are available. These are suitable for Zone 1/2 and Zone 21/22 hazardous areas, with custom sizes and internal PE connections, providing robust protection under heavy loads .

Summary

For Albanian installations, the SHPN Series waterproof distribution boxes are the most common choice due to their IP66 rating, modularity, durable materials, and compliance with international standards. They are ideal for outdoor and indoor use, offering flexibility, safety, and long-term reliability. For specialized industrial or hazardous environments, stainless steel models provide additional protection and customization options.
