Angled elbow of cable tray

Overview

Use with appropriate 45 degree up elbow to change the elevation of a fiber routing system. I have attached a few pictures with examples. Your assistance. Hubbell's NEXTFRAME® Ladder Tray is the effective and widely used cable runway that supports and delivers bundles of cable between cabinets, racks, and closets, along walls, and suspended from ceilings. The Ladder Tray features light, rugged, tubular steel construction. It is designed for. ventilation to heat producing cable such as power communication and other with the same or different width of the cable run. All fittings are available in sizes and types corresponding to the straight cable tray sections. Material choice T&B channel tray systems are fabricated from a corrosion-resistant metal (low-carbon steel, stainless steel or an aluminum alloy) or from a metal with a corrosion-resistant finish (zinc or epoxy).
