StrongBox provides a wide range of backflow enclosures in various sizes, styles, and materials. Their products are engineered to prevent vandalism and unauthorized access, offering corrosion and impact resistance with easy-access configurations suitable for pumps and backflow devices (StrongBox) . GuardShack specializes in high-quality steel backflow security cages. Since 1995, they have offered custom and standard enclosures designed to protect backflow prevention assemblies, air vacuum relief valves, pumps, and other water system components. Their powder-coated steel enclosures are durable, customizable, and designed for both theft and vandalism prevention (GuardShack) . Febco® is a leading manufacturer of backflow preventers and assemblies. Their products combine high-quality stainless steel components with innovative designs like the MasterSeries® and ArmorTek Advanced Coating System, providing superior corrosion resistance, low head loss, and easy maintenance. Febco enclosures are suitable for potable water systems and extreme environmental conditions (Febco) . Zurn offers a complete line of backflow prevention products for fire protection, irrigation, plumbing, and waterworks projects. Their solutions include both the backflow preventers and compatible enclosures, ensuring reliable protection and compliance with industry standards (Zurn) .

Considerations When Choosing a Manufacturer
• Material and Durability: Look for corrosion-resistant materials such as stainless steel or powder-coated steel for long-term performance.

• Security Features: Anti-vandalism and theft-resistant designs are critical for outdoor or public installations.

• Customization: Some manufacturers, like GuardShack, offer custom enclosures to fit unique site requirements.

• Compliance and Certification: Ensure the enclosures meet local plumbing codes and industry standards for backflow prevention.

• Ease of Maintenance: Enclosures should allow easy access for inspection, repair, and winterization if needed. These manufacturers provide reliable solutions for protecting backflow prevention assemblies, ensuring water safety, and maintaining system integrity in residential, commercial, and municipal applications.
