Are Belgian polyurethane cable trays expensive

Overview

Cable Trays Market in Belgium | Report Pricing in the Belgium cable trays market is influenced by a multi-layered set of factors, creating a spectrum from.

Key Takeaways

Belgian polyurethane cable trays are generally considered premium and relatively expensive compared to standard steel trays due to material properties, import reliance, and specialized certifications.Pricing Context in Belgium

In Belgium, standard galvanised steel cable trays typically cost €35–55 per linear metre for common ladder trays, while premium specifications—including fire-resistant, corrosion-resistant, or pre-assembled systems—can carry a 40–80% price premium over standard products . Polyurethane trays, being lightweight, chemically resistant, and suitable for harsh environments, fall into the premium category, meaning their prices are likely at the higher end of this range or above.

Factors Driving Cost
• Material Advantages: Polyurethane offers superior moisture, chemical, and fire resistance, making it more expensive than standard steel or PVC trays .

• Import Dependence: Belgium imports over 70% of cable management products from neighboring EU countries, which adds logistics and import costs .

• Certification Requirements: Compliance with CE marking, ATEX for explosive atmospheres, and Belgian fire-safety codes adds time and cost to procurement .

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Lead Times: Specialized trays with certified fire-resistance or low-halogen coatings can have 10–14 week lead times, which can increase project costs .

• Value-Added Services: Pre-assembled, modular, or BIM-compatible systems often include assembly, drilling, and bracket installation, adding €8–12 per linear metre for customized orders .

Market Trends

The Belgian market is growing in demand for premium cable trays due to energy storage, battery systems, and infrastructure projects. Polyurethane trays are increasingly adopted in subway systems, communication networks, and industrial applications for their durability and lightweight properties . Global trends indicate a CAGR of over 10% for polyurethane cable trays, reflecting their premium positioning and technological advantages .

Conclusion

While exact Belgian prices for polyurethane trays are not publicly listed, they are more expensive than standard steel trays, often exceeding €50–100 per linear metre depending on size, coating, and assembly. Their cost is justified by enhanced durability, chemical and fire resistance, and compliance with stringent safety standards. Belgian buyers typically rely on established suppliers to ensure quality and certification, which also contributes to higher pricing .
