ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Bahamas Fiber Optic Cable Junction Box 24 Cores

Overview

It is used as a termination point for the feeder cable to connect with drop cable in FTTX network system.

Key Takeaways

A 24-core fiber optic junction box provides secure, organized, and weather-resistant management for fiber optic connections in FTTH and FTTx networks.Overview

A 24-core fiber optic junction box is designed to manage and protect up to 24 optical fiber cores, serving as a critical component in fiber optic networks for both indoor and outdoor applications. These boxes are used for splicing, termination, distribution, and storage of fiber cables, ensuring reliable connectivity and protection from environmental factors .

Key Features
• Capacity: Supports up to 24 fiber cores, accommodating SC, LC, or duplex adapters depending on the model .

• Construction: Made from durable materials such as SMC (glass fiber reinforced plastic) or high-density ABS+PC, providing lightweight yet robust protection .

• Environmental Protection: Many models are IP65-rated, offering resistance to water, dust, UV, and shock, suitable for harsh outdoor conditions .

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Installation Options: Can be wall-mounted or pole-mounted, and some closures support aerial, direct buried, underground, or duct installations .

• Cable Management: Includes splice trays, cable routing systems, and rubber-sealed ports to organize fibers and prevent damage during installation and maintenance .

• Splitter Support: Certain models, like the GJS-24-D (PLC), support 1x32 PLC splitters, enabling connections between feeder and distribution cables in FTTP networks .
Applications
• FTTH/FTTx Networks: Provides termination and distribution points for feeder and drop cables.

• Telecom and Enterprise Networks: Ensures organized fiber management in network rooms, corridors, or outdoor junction points.

• Rural and Brownfield Deployments: Compact and flexible design allows deployment in areas with limited space or challenging environments .
Advantages
• Easy Access and Maintenance: Front and rear panels allow straightforward installation and fiber management .

• Durable and Reusable: Many closures feature mechanical seals and buckles that can be opened and reused without special tools .

• Versatile and Cost-Effective: Suitable for multiple installation environments while providing long-term protection for fiber networks . For deployments in the Bahamas, these boxes are ideal due to their resistance to humidity, salt air, and tropical weather, ensuring reliable fiber optic network performance in both urban and coastal areas.
