Cable organizer patent

Overview

patent number D639,145 [Application Number D/348,181] was granted by the patent office on 2011-06-07 for cable organizer. Invention is credited to Ross Matthew Hoek. A cable organizer including a front surface and a rear surface, wherein the front surface and the rear surface define a width therebetween; a first end and a second end, wherein the first end and the second end define a length therebetween; a bottom surface, wherein the bottom surface is adapted. A cable organizer for at least one cable includes: a support structure having a support structure inner periphery and a support structure outer periphery. The support structure has at least one of: at least one first cable accommodation guide disposed at a first distance from the support structure. U. 4 is a left side elevation view of the cable. Said organizer will allow the user to instantly deploy the entire length of the wire attached to speakers or microphones.
