ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Cable tray flat steel fixing clips

Overview

The heavy duty cable tray lid clips (HDG) are designed for securely fixing lids onto 50mm deep cable trays. Manufactured from hot dip galvanised British steel, these clips provide outstanding corrosion resistance and long-term durability for both internal and external use. Cable trays are components used in the wiring of buildings to support insulated cables and organise them to be hidden from view. They offer an alternative to open wiring or electrical conduit systems and are necessary for cable management in commercial and industrial construction, as well as. These are the most corrosion-resistant tray systems we offer for routing cable and hose in configurations such as curves, slopes, and tees. Cut, bend, and connect the wire mesh trays.
