Can the optical terminal box be placed outside

Overview

If fitted outside on the wall, does the Optical Network Terminal (ONT) have to be fitted directly on the other side of the wall, or can it be fitted in another room?

Key Takeaways

Outside Your Home: The ONT can also be located on the exterior of your house, usually close to your electrical panel or utility meter. Outdoor ONTs are mounted outside your home in a weatherproof. The CSP (customer service point) is usually fitted externally, although an internal version is available it's not the default option and won't be offered on the installation day, the reason to have the CSP fitted externally is so access into the house for testing / fault location isn't required. My current router is located in a backroom in the middle of the property and that's where i would like the ONT installed. However this would mean that the cable from the outside box coming in through the wall to one room and then around the walls. Internal set up: We install an ONT (Optical Network Terminal) inside the property. My confusion was because the video they provide shows it outside. Here's a more detailed breakdown of typical ONT locations: Garage: This is a very common spot, often chosen for ease of access for technicians and.
