ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Coarse Wavelength Division Multiplexer Manufacturer

Overview

Coarse Wavelength-Division Multiplexing (CWDM)Ficer Technology is a professional coarse wavelength-division multiplexing (CWDM) supplier that offers a flex.

Key Takeaways

Leading CWDM manufacturers include FICER, Corning, Pro Optix, and Opneti, offering a range of multiplexers for fiber optic networks.Key CWDM Manufacturers

FICER FICER provides a wide range of CWDM products, including transceivers and multiplexers suitable for various data rates from 1.25G to 800G. Their CWDM solutions are designed for cost-effective fiber expansion and support multiple network applications, including high-speed data transmission and PON networks . Corning Corning offers CWDM multiplexers and demultiplexers using advanced thin-film-filter technology. Their products feature industry-standard 20 nm spacing and options for preconnectorized, color-coded, and labeled cassettes. Corning CWDM solutions are suitable for both headend and outside plant installations, providing reliable and scalable fiber connectivity . Pro Optix Pro Optix specializes in CWDM and DWDM multiplexers, including the Pro MINI and Pro NANO series. Their CWDM devices support up to 18 wavelengths per fiber pair for distances up to 120 km. Pro Optix emphasizes high-density, robust solutions with LC and CS connectivity options, catering to telcos, carriers, and enterprise networks . Opneti Communications Opneti manufactures passive optical components, including CWDM building blocks. Their offerings focus on high-quality, cost-effective components for telecom and optical networking applications, supporting flexible deployment in fiber optic systems .

Applications and Considerations

CWDM multiplexers are widely used to increase fiber capacity without laying additional fiber, making them ideal for:

• FTTx deployments and residential broadband expansion

• Business and enterprise dedicated fiber connections

• Backhaul for wireless networks, including cellular and WiFi systems When selecting a manufacturer, consider factors such as wavelength count, distance support, connectivity type (LC or CS), and preconnectorized options to match network requirements . These manufacturers provide reliable CWDM solutions for both short- and medium-range fiber optic networks, enabling cost-effective and scalable optical communication infrastructure.
