Disoric sensor fiber optic

Overview

Di-Soric offers a wide range of optic cables and amplifiers. You may choose diffuse reflective or through-beam fiber type. All items have anti-twist protection. di-soric has an extensive portfolio of optical sensors in various models, light sources and functional principles for process-reliable detection, measurement and testing of even the smallest parts under challenging ambient conditions. Thanks to continuous innovations a vast product range is available, which is completed by high-value LED-lightings, machine vision and ID systems. By detecting whether an object blocks or reflects the light beam, it converts the optical signal into an electrical signal, which then controls the. Kempston Controls is pleased to announce a classic British brand will return to UK ownership with our acquisition of MEM (Midland Electrical Manufacturing). The deal, completed on the 1st December 2021 includes Eaton's MEM MEMSHIELD 1 & 2 and Cranes range. Excel Automation is an authorized di-soric.
