# ZITHA TECH SPECIALTY CABLES (Pty) Ltd

# Distribution box color 7032

## Overview

The distribution box acts as the center of power distribution, distributing electricity to all connected devices.

## Key Takeaways

RAL 7032 is a medium-brightness gray with a warm tone, commonly used for metal distribution boxes.Color Description

The RAL 7032 color, also known as egg lime, is a medium gray with a subtle warm undertone, providing a neutral yet visually appealing finish for electrical enclosures . This standardized color ensures a coordinated and uniform appearance across different installations and environments .

Materials and Construction

Distribution boxes in RAL 7032 are typically made from cold-rolled steel, stainless steel, or galvanized steel, offering high strength and corrosion resistance . They can be manufactured using either welded structures, where sheet metal parts are cut, bent, and welded together, or assembled structures, where parts are processed separately and fastened with screws and tees . The boxes often feature epoxy polyester powder coating for durability and a textured or flat finish .

Protective Features

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

These metal distribution boxes are designed for high protection levels, commonly rated IP65 or IP66, which ensures resistance to dust, water, and other environmental factors . Doors may include polyurethane seals to enhance waterproofing and prevent dust ingress .

Applications

RAL 7032 distribution boxes are widely used in power plants, industrial facilities, and outdoor electrical installations. Their neutral gray color allows them to blend into various environments while maintaining a professional and standardized appearance . They are suitable for wall-mounted, floor-standing, or knock-down configurations, depending on the installation requirements .

Additional Specifications
• Mounting plates may be galvanized or painted in complementary colors such as RAL 2000 .

• Thickness of sheet steel varies by model, typically ranging from 1.2 mm to 2 mm for body and door panels .

• Accessories include locking systems, gland plates, sealing gaskets, and fixing hardware . Overall, RAL 7032 provides a durable, aesthetically neutral, and standardized color for metal distribution boxes, suitable for both indoor and outdoor electrical applications.
