Distribution box ground wire interface

Overview

With this convenient distribution box with a standard pin cable you can connect up to 4 grounding products with a grounded wall socket or a grounded extension cord in a grounded wall socket. Each DISTRIBUTION BOX and controller must be grounded. 26 mm 2 (10 AWG) ground wire must be used, and in all other markets a 6 mm 2 must be used. When lightning strikes or a rogue voltage surge decides to crash the party, proper grounding steps in like a seasoned bouncer, redirecting danger away from. There are several factors that make substation grounding absolutely necessary. Flexible Connection: Braided copper tape should be used between the door panel and the box body. Anti-Loosening. For example, for High And Low Voltage Distribution Cabinets, the distribution box needs to be grounded regardless of size.
