# Distribution box recessed into the wall

## Overview

A recessed electrical enclosure is an electrical box that sits inside a wall, floor, ceiling, or column instead of sticking out. This is why people also call it a flush-mount enclosure. It keeps the space looking neat, saves room, and still protects all the wiring and devices inside. The main. Can a UKK splitter box be installed inside a wall?

Yes, the main body must be pre-buried into the wall cavity during the rough-in stage, leaving only the cover accessible for future maintenance and inspection. Here is the exact step-by-step process for a secure installation: Cavity Preparation: Cut. Snake Tray's structured media enclosures create a distribution point for AV, voice and data applications as well as providing a convenient consolidation point for wiring home runs from wall outlets. The WMPAC525, WMPAC526 and 527 In-Wall Recessed. Having trouble getting the wires behind the television?

Power and low voltage wiring behind even flat mounted television panels is now easy with the Strong™ SM-RBX-WH, a recessed back box that installs like an in-wall speaker and is super flexible for configuring options.
