ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Distribution box size 1000

Overview

D6B Distribution Box | Jensen InfrastructureJensen wastewater distribution box evenly splits effluent among multiple drainfield lines. Designed for septic.

Key Takeaways

Distribution boxes with size 1000 are available in both 1000 x 1000 x 300 mm dimensions and 1000A electrical capacity, suitable for industrial, residential, and solar applications.Physical Dimensions and Mounting

A common wall-mounted distribution box measures 1000 x 1000 x 300 mm and comes with a mounting plate included. These boxes typically have an IP55 protection rating, making them resistant to dust and water splashes, suitable for indoor and semi-outdoor environments . Some models are built with heavy-duty cold-rolled steel, providing robust protection against moisture, overloads, and short circuits . Mounting options include DIN rail or chassis installation, allowing flexible setup for various electrical systems .

Electrical Capacity

Distribution boxes with 1000A capacity are designed for high-power applications, including solar and industrial installations. They often feature copper busbars for optimal conductivity and high-capacity fuses (e.g., 2 x 300A and 6 x 125A) to protect against overloads and short circuits . Some single-pole UKK 1000A boxes use brass conductors and PA material enclosures for durability, impact resistance, and insulation performance . These boxes are modular, allowing customization for different electrical loads.

Features and Safety
• Protection: IP55 or higher, water and dust resistant .

• Material: Metal enclosures (cold-rolled steel or PA plastic) for durability and insulation .

• Modularity: DIN-rail design enables easy upgrades, maintenance, and integration of surge protection or arc-fault detection modules .

• Applications: Suitable for residential, commercial, industrial, and solar power distribution systems .

• Visibility and Operation: Transparent covers allow visual inspection of connections, ensuring safe and reliable operation .
Summary

Distribution boxes labeled "size 1000" can refer to either physical dimensions (1000 x 1000 mm) or electrical capacity (1000A). They are designed for robust, safe, and modular electrical distribution, with options for indoor or outdoor use, high-current applications, and integration with modern monitoring or protection systems. Choosing the right model depends on the required current rating, environmental conditions, and installation type .
