ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Distribution box wiring mold model and specifications

Overview

We can accept your completed drawings and efficiently integrate them into our fabrication process to meet your specifications.

Key Takeaways

Distribution box molds are specialized injection molds designed for producing electrical enclosures, available in single-cavity and multi-cavity configurations with customizable materials and designs.Types of Distribution Box Molds

Single-Cavity Molds: These molds produce one distribution box per molding cycle. They often include beryllium copper inserts at the mold core and cavity neck to improve heat transfer and durability. Single-cavity molds are ideal for low production volumes and cost control . Multi-Cavity Molds: Designed to produce multiple boxes per cycle, typically 4 or 8 cavities. These molds are suitable for high-volume production of smaller junction boxes, allowing efficient use of large injection molding machines .

Mold Materials and Manufacturing

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

High-quality mold steels such as P20, H13, S136, 718, or NAK80 are commonly used. These materials ensure durability, precision, and long mold life, often supporting 500,000 to over 1,000,000 shots depending on the material and maintenance . Advanced manufacturing techniques include CNC machining, EDM, wire cutting, 5-axis machining, and precision polishing to achieve tight tolerances and consistent product quality .

Customization and Design Features
• OEM & ODM Services: Molds can be fully customized based on 3D models, product dimensions, or physical samples .

• Internal Structures: Custom mounting plates, DIN-rail slots, and cable management features can be integrated.

• Wall Thickness and Cooling: Mold designs optimize uniform wall thickness, efficient cooling, and minimal deformation during injection .

• Surface Finish: Options include high polishing, textures, or customer-specified patterns to match market requirements .
Applications

Distribution boxes produced from these molds are used in residential, commercial, and industrial electrical systems. They protect wiring and components, facilitate maintenance, and prevent interference or damage. Common applications include home electrical panels, garden power tools, industrial control boxes, and outdoor electrical enclosures .

Mold Selection Considerations
• Production Volume: Single-cavity molds for low volume; multi-cavity molds for high volume.

• Material Choice: Steel type affects mold longevity and precision.

• Design Complexity: Custom internal structures and surface finishes may influence mold cost and cycle time.

• Delivery and Testing: Manufacturers often provide sample testing and mold validation before mass production . By selecting the appropriate mold type and material, manufacturers can ensure high-quality, durable, and precise distribution boxes suitable for a wide range of electrical applications.

Article Content

distribution box mold supplier

SMC distribution box is becoming more and more popular in the market. MDC mould produces plastic molded parts and moulds for

Electric wire distributor box mold

MINGYU MOULD is a professional plastic mould manufacturer in China,specialized in designing and making kinds of plastic

Injection mould and Compression mould Manufacturer:WYD Mould

WYD Mold is committed to producing high-quality, high-precision plastic electrical distribution box molds (junction box molds,

Electric Distribution Box Injection Mold Power Distribution Box Mold

Our molds are designed for the production of wall-mounted electrical distribution boxes, DIN-rail electrical enclosures, and plastic

Wiremold Catalog 2023-2024

Experience our interactive, profoundly engaging digital publication!

Plastic Electrical Distribution Box Mold Junction Box Injection Mould

Hongchuan Mould is a highly reputable and experienced manufacturer of plastic injection molds, specializing in a wide range of

RFBA 4-Gang Floor Box | Concrete Floor Boxes | Floor Boxes | Wire

Improved wire and cable routing makes wire pulling much easier in adjacent compartments and around corners.

ELECTRICAL DISTRIBUTION BOX

We can accept your completed drawings and efficiently integrate them into our fabrication process to meet your specifications.

Wire Box Mold for Efficient Wiring Solutions

We are a professional junction box mould & precision plastic injection mould manufacturer, offering wire

Product categories Electrical Boxes :Allied Moulded Products

Floor box assemblies for residential wood floor cut-in applications. Available options include single gang, two gang, round profile,
