ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Domestic optical fiber cables

Overview

Selecting the right indoor fiber optic cable involves considering type, specifications, sheath, connection method, price, brand, and future needs. Single-mode is for long-distance, high-bandwidth needs, while multimode is for short-range, cost-effective solutions. Fiber-optic cable is a thin transparent tube made of silica that guides light waves and is used to transport data. Bending it more than recommended will increase attenuation as light escapes the core and can result in. Indoor fiber cable is the backbone of modern communication networks within buildings, providing the high-speed data transmission necessary for everything from business operations to home entertainment. Unlike copper wires, which are limited by lower data transmission speeds, shorter transmission distances, and higher susceptibility to electromagnetic interference, fiber optic cables offer unparalleled performance and can. Eland Cables supplies a range of fibre optic cables for both indoor and outdoor installations. These are interchangeably referred to as fibre optic and optical fibre.
