ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Fiber Optic Cable Trenching Machine Manufacturer

Overview

For fiber work in communities and cities, Vermeer has the full equipment lineup and is sized for your fiber-installation needs.

Key Takeaways

Leading manufacturers of fiber optic cable trenching machines include Tesmec, AFT Trenchers, KEMROC, and Ditch Witch, offering solutions for urban, suburban, and long-distance fiber installations.Tesmec

Tesmec provides a full range of trenching solutions for urban fiber networks (FTTx), suburban city rings, and long-distance backbone networks. Their trenchers are designed for high efficiency, precision, and minimal disruption, supporting fast installation of underground conduits for telecommunication networks, including 5G and optical fiber projects . Tesmec also offers an integrated value chain with solutions for detection, mapping, trenching, vacuuming, backfilling, and road surface finishing, making them a comprehensive choice for fiber optic deployment.

AFT Trenchers

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

AFT Trenchers specializes in efficient and reliable trenching equipment tailored for the fiber optic industry. Their machines are designed to create precise, narrow trenches, including microtrenching for urban areas, which minimizes disruption to roads and pavements. AFT trenchers enable contractors to achieve clean, consistent trenches quickly, improving installation efficiency and cost-effectiveness while protecting the fiber cables from environmental hazards .

KEMROC

KEMROC offers cable trenching attachments suitable for laying fiber optic and other utility lines with minimal surface disruption, ideal for urban environments. Their equipment can handle trench widths from 80 mm to unlimited widths and depths up to 14 meters, adaptable for hard rock and demanding conditions. KEMROC trenchers ensure consistent, precise trenches that protect cables and reduce installation challenges, making them suitable for both small and large-scale projects .

Ditch Witch

Ditch Witch provides microtrenchers like the MT12, specifically designed for fiber-optic cable installation. The MT12 creates narrow, shallow trenches through asphalt, allowing fiber to be installed with minimal disruption to surrounding infrastructure. Ditch Witch emphasizes a full-system approach, including training, service parts, and manuals, to support contractors in efficient fiber deployment .

Summary

For fiber optic cable trenching, manufacturers like Tesmec, AFT Trenchers, KEMROC, and Ditch Witch offer specialized machines that cater to different project scales and environments. Key considerations when selecting a manufacturer include trench width and depth capabilities, microtrenching options, surface disruption minimization, and integrated support services. These companies provide reliable solutions for modern telecommunication networks, including 5G, IoT, and urban broadband infrastructure.
