Fiber optic FCSC interface

Overview

LC vs SC vs FC vs ST: A Complete Fiber Optic Connector GuideCompare LC, SC, FC & ST fiber-optic connectors — size, coupling, and ideal use cases — to help.

Key Takeaways

FCSC is a type of fiber optic connector that provides precise alignment and low-loss connections for single-mode optical networks.Overview

The FCSC (Fiber Connector, SC to FC) is a fiber optic interface designed to connect FC-type and SC-type optical fibers, commonly used in single-mode networks . It allows seamless integration between older FC connectors and newer SC connectors without requiring replacement of existing cabling, making it ideal for network upgrades and maintenance . FCSC connectors are widely used in FTTH (Fiber to the Home) deployments, data centers, and telecom networks .

Technical Features
• Connector Type: FC-to-SC interface, often with UPC (Ultra Physical Contact) polish for minimal back reflection .

• Ferrule Material: Pre-radiused zirconia ceramic ferrules for precise fiber alignment .

• Insertion Loss: Typically less than 0.5 dB, ensuring efficient signal transmission .

• Adhesive Options: Can be installed using epoxy or anaerobic adhesives, with curing options for field or factory installation .

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Standards Compliance: Meets ANSI/TIA/EIA 568-C and ANSI/TIA/EIA 604 (FOCIS) connector interface requirements .
Applications
• Network Upgrades: Connects older FC-type fiber to newer SC-type equipment without rewiring .

• Single-Mode Networks: Compatible with OS1 9/125 single-mode fibers, suitable for long-distance and high-speed data transmission .

• FTTH Projects: Commonly used in residential fiber deployments due to its reliability and low insertion loss .

• Data Centers and Telecom: Provides flexible, maintainable connections for patch panels, transceivers, and optical network equipment .
Advantages
• Ease of Installation: Field or factory installation with epoxy or anaerobic adhesives.

• Low Signal Loss: High precision ferrules and UPC polish reduce back reflection and insertion loss.

• Compatibility: Bridges legacy FC networks with modern SC-based systems, avoiding costly cable replacement.

• Standards Compliance: Ensures interoperability with industry-standard fiber optic equipment. In summary, the FCSC fiber optic interface is a versatile, low-loss connector solution that enables smooth integration between FC and SC fiber types, making it essential for network upgrades, FTTH deployments, and high-performance single-mode optical networks .
