ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Fiber optic model lcscfc

Overview

OPTIC FIBER PATCH CORDS FEATURES & BENEFITS Adopts high precision ceramic ferrule with good concentricity.

Key Takeaways

The LCSCFC fiber optic model refers to a hybrid fiber optic patch cord or adapter combining LC, SC, and FC connectors, suitable for multimode or single-mode optical communication applications.Overview

The LCSCFC model is a type of fiber optic patch cord or adapter designed to interconnect devices with different connector types—LC, SC, and FC—allowing flexible integration in optical networks. These hybrid connectors are commonly used in telecommunications, broadband data access, FTTH (Fiber to the Home), and industrial optical communication systems. They support high-speed data transmission and are compatible with both indoor and outdoor optical cables .

Key Features
• Connector Types: LC, SC, FC hybrid configuration for versatile connectivity .

• Cable Type: Available in multimode or single-mode fiber, depending on network requirements .

• Customization: Lengths and specifications can be tailored to customer needs, including indoor/outdoor cables, bundled soft optical cables, and self-supporting outdoor cables .

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Certifications: Products typically comply with RoHS and other international standards, ensuring safety and reliability .

• Applications: Widely used in telecom, radio and TV networks, subway systems, military communications, smart wiring, aviation, and sensing applications .
Manufacturers and Sourcing
• Qingdao Jintong Jiaxin Import & Export Co., Ltd. produces LCSCFC fiber optic patch cords and offers customized solutions for various optical cable needs .

• LCSC Electronics lists related components like FO-FC-FS (FC-A1)-PBS with datasheets, pricing, and BOM tools for procurement .

• AliExpress and Alibaba provide LC-SC-FC hybrid adapters for small quantities, suitable for testing or small-scale deployment .
Advantages
• Flexible connectivity between different fiber optic standards.

• High-quality signal transmission with low insertion loss.

• Customizable lengths and configurations to fit specific network layouts.

• Global availability with shipping options to multiple countries . In summary, the LCSCFC fiber optic model is a versatile, hybrid connector solution that enables seamless integration of LC, SC, and FC interfaces in optical networks, supporting both standard and customized applications across multiple industries.
