ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Flame-retardant distribution box model and specification table

Overview

Standard nominal technical parameters of the distribution box: 1 to 4 channels: 50A; 6 to 18 channels: 63A Material insulation: fire-resistant refractory; color: white; Standard: compliant with IEC Standard 060439 - 3 IEC 60529 protection class: IP 30; fire protection and normal. Standard nominal technical parameters of the distribution box: 1 to 4 channels: 50A; 6 to 18 channels: 63A Material insulation: fire-resistant refractory; color: white; Standard: compliant with IEC Standard 060439 - 3 IEC 60529 protection class: IP 30; fire protection and normal. Specification code(I,II,IIB. Flameproof enclosure (Ex d IIB+H2), which can be used as feed distribution equipment in control and distribution system (such as distribution box, switch box of main circuit, control box, terminal box or motor starting box etc.) ·Enclosure: stainless steel. Equipped. Our production systems can give custom-made solutions on demand. A variety of protection standards thanks to our own painting facilities. The electric box main body comprises an upper cavity and a lower cavity, a flame-retardant partition plate is connected between the upper cavity and the lower cavity, and. The DB4 Series Waterproof Distribution Boxes offer secure, flame-retardant enclosures with prefabricated rails and terminals, ideal for outdoor and damp environments. Designed for safe power distribution, they ensure reliable performance and comply with international standards.
