ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Google s self-built fiber optic cable

Overview

Again, if you ever want something done that is beyond our scope you can install your own conduit or run the cable yourself. The FJ installed has power, fiber and ethernet connectors.

Key Takeaways

GFiber offers two installation paths to connect your home to our fiber-optic network: professional installation by a technician or a simple self-setup for eligible addresses. Whether a technician does the work or you do it yourself, we're here to guide you every step of the way. Both options include the necessary equipment, such as a Fiber Jack and an advanced Wi-Fi router, at no additional cost. This small device connects the fiber optic signal from the NIU to your home's internal network. Sometimes existing lines. Looking to maximize internet speeds at your home? Matt show's you how in today's video where he meets up with Lee of Voltek Inc while at the Risinger Build to discuss ways that you can properly install your fiber cables and set your house up for super fast internet but also be prepared f.
