Green tube of 24-core optical cable

Overview

The fibre cable core consists of a central jelly filled green polyester tube, with up to 24 optical fibres contained within. The tube is protected with aramid strength member and a 1. 1mm thick FireBur LSZH sheath plus a layer of 0. By adopting the TIA/EIA-598C standard, you gain a universal “language” of colors that speeds identification, reduces miswiring, and enhances safety.
