ZITHA TECH SPECIALTY CABLES (Pty) Ltd

High-density hot-swappable power distribution unit 4U available now

Overview

This latest product, jointly developed with Supermicro Computer Inc. (“Supermicro”), possesses a 4U-size, 250kW cooling capability, and meets the OCP (Open Compute Project) standard. Building a Highly Efficient Redis on Flash Cluster with Supermicro X12 FatTwin® Servers Construct Optimized IT Solutions With The Supermicro X12 Twin Family Of Multi-Node Servers Fortune 100 Technology Company Uses Supermicro Servers to Handle Trillions of Events and Messages, without any Data Loss. Tripp Lite offers Hot-Swap PDUs, which make any UPS hot-swappable, as well as Hot-Swappable Modular UPS Systems, which integrate a detachable Hot-Swap PDU. The key component of the hot-swappable design is a modular power distribution unit (PDU) that combines all input and output power connections. Designed to address the escalating cooling demands of artificial intelligence (AI) and high-performance computing (HPC), the new CDU delivers 120 kW of cooling in just 4U, combining scalability, redundancy, and intelligent monitoring in a compact form factor. The NovaCool™ Rack CDU combines high. Nidec Corporation (TSE: 6594; OTC US: NJDCY) (“Nidec”) today announced that it has started shipping (as the first company in the world to do so)* a CDU (Coolant Distribution Unit) as a new in-rack-type cooling solution for nextgeneration data centers. It is a high-performance computing server with Intel C621 chipset. Its compact 4U design installs easily at the top or bottom of any standard 19” rack enclosure, seamlessly integrating into your existing.
