1. Breaker Boxes with Extension Kits Breaker boxes, also called main panels or load centers, distribute electricity to circuits in your home. You can expand their capacity using extension kits, which add space for additional breakers without replacing the entire panel. Brands like Square D, Siemens, and ABB offer 1-inch to 7.4-inch extension kits suitable for indoor or outdoor panels, supporting both 120V and 240V circuits . 2. Electrical Box Extenders For outlet or switch boxes set too far back from the wall, box extenders add depth to the existing enclosure. These are typically UL-listed zinc-plated steel units that mount over steel outlet boxes, providing extra wiring space and ensuring devices sit flush with the finished wall . 3. Weatherproof and Outdoor Distribution Boxes Outdoor or wet-location applications require weatherproof enclosures. Options include IP54 to IP67-rated ABS or steel boxes with hinged covers, sealing plugs, and DIN rail compatibility. These boxes can house outlets, breakers, or project wiring safely against rain, dust, and UV exposure . 4. Multi-Outlet Extension Boxes For home entertainment or office setups, extension boxes with multiple outlets, surge protection, and individual switches allow safe distribution of power from a single source. These units often feature fire-retardant construction, child safety shutters, and heavy-duty internal connectors .

Key Considerations
• Amperage and Circuit Capacity: Match the extension or new box to your panel's amperage rating and the number of circuits you plan to add .

• Indoor vs Outdoor Use: Ensure outdoor boxes are weatherproof and rated for wet conditions. Indoor boxes can be standard plastic or metal enclosures.

• Compatibility: Verify that extenders or kits fit your existing panel or outlet box type (square, rectangular, or round) and support the devices you intend to install.

• Safety and Code Compliance: Always follow local electrical codes and consider hiring a licensed electrician for panel modifications or high-voltage installations.
Popular Products
