How long is the validity period of a relay protection certificate

Overview

The broad guidelines state that type tests should be conducted in accredited laboratories and reports should contain full testing details.

Key Takeaways

National/ International standards does not specify any period for validity of type test results. Therefore, there is a need to address such issues and develop uniform practice/ guidelines relating to the period of validity of Type Test reports of major. This Regional Reliability Standard shall be in effect for one year from the date of Commission approval or until a North American Standard or a revised Western Electricity Coordinating Council Regional Reliability Standard goes into place, whichever occurs first. At no time shall this regional. Protective relaying serves many functions including isolating faulted circuits or equipment from the remainder of the system so the system can continue to function, limiting damage to faulted equipment, minimizing the possibility of fire or damage to adjacent equipment, and minimizing hazards to. provided in October 2020 which is valid upto 30th September 2021. At that time it was anticipated that this pandemic would be over and manufacturing & testing process would become normal again. However, since the quality of workmanship and the quality of components/ materials used in manufacturing of the equipment may change/ deteriorate over the years affecting overall quality, reliability. Ministry of Power also advised Central Electricity Authority (CEA) to consider extending the validity period of type test reports for some equipment. Considering the above, an exercise has been undertaken to revise the said guidelines. The principles of rationality, uniformity across all domains of.
