How to make fiberglass hard tails shinier

Overview

It's a process: thorough cleaning, decontamination to get the embedded grit out, compounding to knock down oxidation and scratches, and a final polish to make it shine. We're about to unveil 5 essential fiberglass cleaning secrets that will transform your approach to both effective cleaning and crucial preventative maintenance. This is a in depth, detailed, full-length video with tons of tips and tricks that we are happy to share with you. Every step is important to achieve a quality job, so sit back and enjoy our Best Fille. more KEEL DAMAGE?

Watch a. Gelcoat is a liquid that hardens to form a thick layer that's used to protect fiberglass and give it a shiny, smooth finish. Fill in any cracks or gouges in the fiberglass with polyester. A high-gloss gelcoat finish can make a boat or fiberglass surface shine beautifully while protecting it from the elements.
