Innovative Development of Burundi s Energy Internet

Overview

ARCT unveils plans for solar-powered solutions and new towers to improve network reliability amid ongoing connectivity issues. The Burundian government has pledged to take concrete steps to resolve persistent internet network difficulties, which have fueled widespread frustration. Working on World Bank energy projects in Burundi and watching improved access to electricity unfold, has given me a sense of optimism about the future of the country. Needed reforms are starting to take shape, and I believe that with continued commitment and collaboration among the government. At the launch of Burundi's National Energy Compact during the Mission 300 (M300) Private Sector Consultation in London, Anzana Electric Group and the African Development Bank (www. org) announced a $600,000 project development grant from the Sustainable Energy Fund for Africa (SEFA). The grant. Bururi, June 29, 2025 — The President of the Republic of Burundi, Évariste Ndayishimiye, officially inaugurated the Jiji hydroelectric power plant on the river of the same name in Songa district, Bururi province (southern Burundi) on Tuesday. This event marks the official acceptance of the facility. BUREA). It is part of a series of briefing notes that provide a high-level overview of the status of countries' off-grid solar markets, as well as relevant policies and pr ountry. We welcome any updates, revisions or clar-ifications at info@go Sec proach.
