# Installation of support brackets for high-span cable trays

## Overview

Support Methods: Common support methods include trapeze hangers, which are used for ceiling suspensions, and cantilever wall brackets, which are mounted directly to walls for runs along vertical surfaces. The choice depends on the building structure and the planned tray . When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resil- for each of these installation challeng- ience and safety. es in the industrial environment. Our cable support. This publication is intended as a practical guide for the proper and safe* installation of cable ladder systems, cable tray systems, channel support systems and associated supports. Please consult our factory for situations not covered in this guide. Thread hex nut 25 mm (1") to 50 mm (2") above location of the tray. us-trations without notice. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned.
