# ZITHA TECH SPECIALTY CABLES (Pty) Ltd

# Lebanon Spiral Wound Pipe Machine Rack Type

## Overview

The Krah production technology is a helical extrusion (spiral wound) process that allows to produce profiled pipes for gravity application, solid wall pressure pipes and all kinds of special wall structures to produce fittings, manholes and accessories. We supply machine to produce the HDPE/PP KRAH spiral wound profile pipe and fittings, manhole from DN/ID300mm to DN/ID 4500mm. The main applications for the krah profile wall wound pipe products are non-pressure applications like drain, storm water, sea outfall, sewer piping systems, marine. This advanced production line is designed for manufacturing HDPE spiral wound pipes-also known as Krah pipes, structural wall drainage pipes, or spiral interlock pipes. These pipes are increasingly replacing traditional cement and cast iron pipes in municipal sewerage and drainage systems, thanks. Since 1968 Krah has been developing and producing Krah helical extrusion pipe production technology in the Westerwald region of Germany., Ltd is a professional. This method is based on the principle of an extruded plastic profile with high ring rigidity. PVC or PE-HD profiles are used and wound to form a new pipe using a winding machine. 20 gauge maximum thickness 3 inch to 60 inch diameters Cutting up to 20 feet in length Variable diameters are automatically selected Very low hours of use Contact for details! Max od: 3,302 mm | Max w/t: 25 mm | Mx lgth: 18 meters | Mill type: API Spiral Pipe Mill | Builder:.

## Article Content

Drainage pipe production line

We supply machine to produce the HDPE/PP KRAH spiral wound profile pipe and fittings, manhole from DN/ID300mm to DN/ID 4500mm.

HDPE Large Diameter Spiral Wound Pipe Making Machine / Krah

This advanced production line is designed for manufacturing HDPE spiral wound pipes-also known as Krah pipes, structural wall drainage pipes, or spiral interlock pipes.

KRAH

The Krah production technology is a helical extrusion (spiral wound) process that allows to produce profiled pipes for gravity application, solid wall pressure pipes and all kinds of special wall structures

Large diameter spiral wind pipe and PPH tank extruder

We manufacture spiral wound pipe machine, PPH tank equipment and solid wall wind pipe production line with 3 years warranty!

Lining with spirally wound pipes for gravity pipes | RTi

With the machine positioned in the shaft, the spirally wound pipe is wound into the host pipe with a smaller diameter than the old pipe. Then, depending on the

New & Used Spiral Pipe Machine for sale. Union equipment & more

Search for used spiral pipe machine. Find Union, Ridgid, Drill pipe, Lockformer, Spiral-Helix, and Grizzly for sale on Machinio.

SEKISUI Pipe Lining Solutions for Large Pipelines |SPR™

SPR™ is a Spiral Wound pipe lining method for large diameter sewers, storm drains and culverts. SPR™ lines both round and non-round shapes, providing fully

KRAH Spiral Wound Profile Pipe Machine

We supply spiral wound profile pipe machine. This machine can produce the HDPE/PP spiral wound pipe and fittings, manhole from DN/ID300mm to DN/ID

SPIRAL WELDSEAM PIPE MACHINE (SWPM)

The New Generation Spiral Weld Mill designs can provide pipe diameters from 200 to 4200 mm, with wall thicknesses ranging from 2 to 25 mm and pipe lengths up

HDPE/PP Spiral winding pipe extruder machines

*© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved*

LGB200-4500mm hollow wall Spiral winding pipe production line equipment is a new type of pipe equipment developed by our factory in combination with international advanced equipment.

Spiral Wound Gaskets: Specifications, Materials, and

Spiral wound gaskets are also used in marine applications where they must resist seawater corrosion and endure high-pressure conditions. Using

Spiral Wound Liner

Spiral Wound PVC – Machine spiral wound PVC liner is intended for use in the rehabilitation of sanitary and storm sewers without excavation. The lining process uses a continuous one piece PVC profile

Spiral Machines | Fablink

Fablink offers dependable, effective, and user-friendly spiral machines that convert flat metal sheets into sturdy, long-lasting pipes with a spiral seam.

Spiral-Wound Pipe Liners: Why You Should Consider

From the constructability and environmental advantages of using spiral-wound liners, contractors have realized their many advantages.

Spiral Pipes

Spiral Pipes IPIC is Producing Large Diameter SSAW Spiral Submerged Arc Welded Pipes up to 3,000mm Outside Diameter and up to 20mm Wall Thickness

Spiral Welded Pipe

The use of spiral-welded pipes offers various benefits. As previously mentioned, this type of pipe subjects the weld to less stress than its straight-welded counterpart,

Spiral Welded Pipe

Spiral-welded pipe is defined as a type of pipe produced from coils of steel that are flattened and formed into a cylinder using angled rollers, with the spiral seam sealed by submerged arc welding (SAW). It

How to Install Spiral Wound Pipe Lining in Live Flow

Spiral wound is capable of being installed in up to 30% low-velocity flow. If these conditions are not met, a modified bypass pumping or temporary

Spirally Wound Lining | Springer Nature Link

*© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved*

This chapter introduces the spirally wound lining method. It includes the application range of this method, how to design the construction when using spirally wound lining method to

(PDF) Spiral Wound Pipe as a Rehabilitation Method

The goal of this project was to study the spiral wound pipe rehabilitation method, looking at all the potential benefits of this pipe

Spiral Wound Lining | Pipe Rehabilitation | SEKISUI SPR

Spiral Wound Liners are a trenchless pipe lining method to restore pipelines. The process is 100% mechanical for efficient, environmental pipe lining.

Spiral Wound Gaskets | Goodrich Gasket Pvt Ltd.

Goodrich Gasket manufactures high-quality Spiral Wound Gaskets with excellent compressibility and recovery for reliable seal integrity in high pressure.

Rehabilitation with spiral wound pipe lining

Rehabilitation with spiral wound pipe lining consists in putting a winding machine into the host pipeline (or manhole) and the feeding of the lining material which is an appropriately profiled plastic strip. In

12 Spiral Pipe Manufacturers in 2026

12 Spiral Pipe Manufacturers in 2026 This section provides an overview for spiral pipes as well as their applications and principles. Also, please take a look at the list of 12 spiral pipe manufacturers and

Lining with spirally wound pipes for gravity pipes | RTi

The spiral-wound new pipe is designed as a self-supporting structure and, depending on the system, installed either without an annular gap as a close-fit

SPIRAL WELDSEAM PIPE MACHINE (SWPM)

Minimum changeover time is required for diameter change. The production output speeds vary according to the type and gauge of the material being used. PRD

Spiral Wound Gaskets: Specifications, Materials, and

Spiral wound gaskets are also used in marine applications where they must resist seawater corrosion and endure high-pressure conditions. Using

Spiral Wound Liner
