Lifespan of Indoor Distribution Box

Overview

I know that Elec Distribution Equipment (Panelboards, Switches etc.) have a life expectancy of 50-70 years, depending on installation conditions.

Key Takeaways

You can generally expect a power distribution box to last anywhere between 8 to 15 years, depending on the application it's being used for, the environment it's operating in, and how frequently it's serviced. Rubber boxes which spend their lives indoors are much more likely to have a longer. Estimated useful life (EUL) represents the anticipated operational lifespan of a system or component before replacement or major repair is expected. EUL for building systems and components reflects design and manufacturing standards. I know that Elec Distribution Equipment (Panelboards, Switches etc. This is based on information from Schneider Electric. As a central component that manages power flow throughout a facility, a well-maintained distribution box e.
