New Regulations for Annual Inspection of Distribution Boxes

Overview

The regulations require that landlords have the electrics in their rented properties checked at least every 5 years by a properly qualified person.

Key Takeaways

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

The SFG20 44-07 standard requires specific 6-monthly checks that include visual inspections for physical damage, verification of proper labelling, checking protective devices, identifying overheating issues, and ensuring overall functionality of distribution boards. Guidance setting out how electrical safety standards regulations for the private and social rented sectors affect landlords, tenants and local authorities. The Electrical Safety Standards in the Private Rented Sector (England) Regulations 2020 were updated in 2025 to include the social rented. The issue centres around SFG20 44-07 requirements, which mandate specific 6-monthly checks for distribution boards – checks that many FM providers mistakenly believe are covered by their regular EICR (Electrical Installation Condition Report) inspections. The issue concerns SFG20 44-07 requirements for distribution board maintenance, which are often overlooked in standard. In addition, Section 5 (a) (1) of the Occupational Safety and Health (OSH) Act, often referred to as the General Duty Clause, requires employers to "furnish to each of his employees employment and a place of employment which are free from recognized hazards that are causing or are likely to cause. The scope of this document provides clarification on the inspection requirements to undertake full inspection on Low Voltage (LV) distribution boards, Pillars and Transformer take off cabinets under Live conditions. DEWA Regulations for Electrical Installations - 'U.
