ZITHA TECH SPECIALTY CABLES (Pty) Ltd

No internet connection despite three fiber optic cables connected to the router

Overview

Restarting your router, checking your modem connection, and resetting network settings often resolve the problem quickly. When issues like signal loss, slow speeds, or intermittent connectivity arise, systematic troubleshooting is key. This guide will walk you through diagnosing and resolving common. Your fiber optical network terminal (ONT), modem, or gateway provides LEDs letting you know the status of your internet (wide area network, or WAN) and home network (local area network, or LAN) connections. Here's an example of LEDs to look for if you have fiber internet and an ONT: The Power LED. These troubleshooting steps are for users who have already completed the initial setup but still cannot get internet access through their router. These high-speed, high-capacity communication networks are increasingly replacing copper cables, offering superior performance and. Examine the LAN cable connections: Make sure that one end of the LAN cable is securely plugged into the WAN port of your router, while the other end is connected to the socket or fiber converter. Brightspeed has three main fiber-compatible routers: the Calix u6, the C4000XG.
