ZITHA TECH SPECIALTY CABLES (Pty) Ltd

ONU equipment and splitter

Overview

The user equipment ONU is connected through an ODN network (composed of an optical fiber and a passive optical splitter). Realize the functions of control, management and ranging of the ONU of the user equipment. ONU converts optical signals transmitted via fiber to electrical. A GEPON system usually consists of an OLT (Optical Line Terminal) at the service provider's central office and multiple ONU (Optical Network Units) or ONT (Optical Network Terminals) close to the end user as optical splitters. In addition, the transmission between OLT and ONU/ONT adopts an optical. There are two important types of systems that make FTTH broadband connections possible. By far the majority of FTTH deployments in planning and in deployment use a PON in order to save on fiber costs. In contrast to an active optical network. Explore FTTH Network Design and Key Components Including OLT, ONU, Optical Splitters, and Fiber Distribution Boxes for Reliable Home Connectivity OLT→FDH→FDB→FAT→ONU/ONT FTTH (Fiber To The Home) is a technology that provides high-quality internet access directly to consumers' homes over an optical. Home Products and Solutions InterConnect Switches Products AON Network AON Network Accessories H3C Passive Optical Splitter ONU Passive optical splitter, also known as splitter, is a passive device used for power coupling and distribution of optical signals.

Article Content

What are OLT, ONU, ONT and ODN in PON?

The structure of primary light splitting is an OLT-optical splitter-ONU, and the optical splitters from OLT to ONU are all connected in parallel. When using primary splitting, the splitter is

FTTH Products | OLT, ONU, Optical Splitters, Fiber

Discover essential FTTH products like OLT, ONU, optical splitters, and fiber distribution boxes. Learn how to design and deploy an efficient FTTH network for

H3C Passive Optical Splitter ONU-H3C

The splitter is one of the important components of the PON network. As an optical distribution network, it can connect OLT and ONU devices to distribute data downstream and concentrate data upstream.

Primary and secondary optical splitters in FTTH networks

Generally, the equipment with network monitoring including optical receiver, uplink optical transmitter and multiple bridge amplifiers is called optical

What is OLT, ODN, ONU, and ONT in FTTH?

OLT ← ODN → ONU/ONT In both setups, an optical splitter is used to divide the fiber signal from the OLT to serve multiple ONUs/ONTs. Conclusion OLT, ODN, ONU, and ONT form the

A Quick Guide to ONU (Optical Network Unit)

In the realm of telecommunications, the ONU is a vital force, enabling seamless connectivity and high-speed data transmission. As a user side device of FTTX application, ONU is a

Understanding OLT, ONU, ONT, and ODN for Fiber

Understanding OLT, ONU, ONT, and ODN for Fiber As the industry for fiber optical networking continues to grow, one corner of the market is pushing innovation

Epon Onu Splitter

About epon onu splitter Introduction to Epon ONUs Splitters The epon onu splitter is a crucial component in modern fiber optic networks, especially in passive optical networks (PON).

What is ONU: Concept, Features and Types

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

Optical Network Unit, the IEEE term for what is called an Optical Network Terminal in ITU-T terminology. ONU realizes "triple-play" applications by providing services such as data, IPTV (interactive network

ABC of PON: Understanding OLT, ONU, ONT and ODN

There are different types of OLT, ONU, ONT equipments for GEPON, which are the new generation PON equipments and mainly applied by telecommunication operators in FTTH project.
