ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Optical Power Meter Connector

Overview

2.5 mm Universal to XL optical power meter connector adapter. For connectors such as SC, FC, ST, LSA. Also duplex SC.

Key Takeaways

Optical power meters can use a wide range of connectors including LC, SC, FC, ST, MPO/MTP, MU, and POF, often via universal or specific adapter caps.Common Connector Types

Single-Fiber Connectors:

• LC, SC, FC, ST – These are the most widely used single-fiber connectors for both singlemode and multimode fibers. They can be connected using thread-on or locking-pin adapters depending on the power meter model .

• MU – Small form factor connectors compatible with 1.25 mm ferrules . Duplex Connectors:

• Duplex LC, SC, FC, ST – Duplex adapters allow simultaneous measurement of two fibers, often using specialized adapter caps like OPT224 or OPT225 for XL series meters . Multi-Fiber Connectors:

• MPO/MTP 12x or 16x – Multi-fiber ribbon connectors for multimode or singlemode fibers, requiring adapters with central or offset keys .

• MT Ferrule / MMC Connector – For up to 12 or 16 fibers, depending on the power meter series . Plastic Optical Fiber (POF) Connectors:

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• SC, ST, FC, SMA, HFBR, Mini Toslink – Special adapters with large pin-holes accommodate POF cables and connectors .
Adapter Systems

Universal Adapter Ports:

• Many optical power meters feature universal ports that accept either 1.25 mm ferrules (LC, MU, SFF) or 2.5 mm ferrules (ST, SC, FC) using interchangeable adapter caps .

• These adapters ensure accurate optical alignment without requiring a latching mechanism, allowing multiple connector types to mate with the same port . Thread-On and Locking-Pin Adapters:

• Thread-on adapters are simple screw-on caps for single-fiber or duplex connectors .

• Locking-pin adapters (e.g., AC900 series) provide improved measurement precision for single-fiber, duplex, or multi-fiber ferrules .
Summary

Optical power meters can accommodate a broad spectrum of fiber optic connectors through specific or universal adapters, including LC, SC, FC, ST, MU, MPO/MTP, and POF types. The choice of adapter depends on the ferrule size, fiber type (singlemode or multimode), and whether the connection is simplex, duplex, or multi-fiber. Universal ports and hybrid adapters further enhance compatibility, making it possible to measure virtually any common fiber optic connector type .
