ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Price of Optical Fiber Cables for Communication Transmission

Overview

Fiber Optical Cable market size was valued at $89.16 billion in 2026, projected to reach $115.79 billion by 2030 at a 6.8% CAGR.

Key Takeaways

Fiber optic cable prices range from $0.09 to $6 per foot depending on type, strand count, and construction, with single-mode generally cheaper than multimode.General Pricing Overview

• Retail prices: $1 to $6 per linear foot depending on fiber count and cable type .

• Wholesale bulk purchases: $0.09 to $1.52 per foot .

• Single-core FTTH drop cable: Approximately $0.13 per foot .

• High-count backbone cables (e.g., 288 strands): Up to $6 per foot or more .

Pricing by Fiber Type

• Single-mode fiber (OS1/OS2): $0.10 to $0.50 per foot for the cable itself; ideal for long-distance communication .

• Multimode fiber (OM1, OM2, OM3, OM4): $0.30 to $1.00 per foot; suitable for shorter distances and in-building networks .

Pricing by Strand Count

• 12-strand cable: Around $0.50 per foot .

• 24-strand cable: Approximately $1.00 per foot .

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Higher strand counts increase costs proportionally.
Construction and Rating
• Indoor riser-rated cables: Lower cost, suitable for vertical runs between floors .

• Plenum-rated cables (OFNP): Higher cost, required for air-handling spaces due to fire safety standards .

• Armored or direct-burial cables: $0.50 to $5 per foot, designed for harsh environments .
Pre-Terminated Assemblies and Patch Cables
• Factory-terminated cables with connectors cost more than raw cable, with prices varying by connector type and fiber count .
Market Trends
• Recent market data from China shows a price surge in single-mode fiber in early 2026, reflecting global supply constraints .

• Prices for G.652D single-mode fiber have increased significantly, affecting finished cable costs, especially for patch cables and indoor assemblies .
Additional Considerations
• Installation costs: Underground or complex installations are more expensive than aerial or indoor runs.

• Material choice: Glass fiber cores are standard for high-speed, long-distance applications, while plastic optical fiber is cheaper but less performant .

• Longevity: Fiber optic networks typically last 20–30 years with lower maintenance costs compared to copper networks . For purchasing, suppliers like Mouser Europe and DigiKey provide inventory, datasheets, and pricing for various fiber optic cables, including single-mode, multimode, and pre-terminated assemblies . This pricing guide can help in budgeting for both material-only purchases and complete network installations.
