Price of the internal structure of an 8-core optical cable

Overview

8 core fiber optic cable price per meterThe construction of an 8-core fiber optic cable utilizes materials that ensure minimal signal loss and high bandwid.

Key Takeaways

The material cost of an 8-core optical cable typically ranges from $0.50 to $6 per foot, depending on fiber type, construction, and environmental protection.Cost Overview

The internal structure of an 8-core optical cable includes the fiber cores, strength members (such as stranded steel wires), loose tubes, water-blocking materials, and protective sheaths like polyethylene (PE) or corrugated steel tape for armored cables . The price varies based on:

• Fiber Type: Single-mode fibers are generally cheaper per foot ($0.10–$0.50) than multimode fibers ($0.30–$1.00) due to manufacturing differences .

• Cable Construction: Loose-tube, tight-buffered, armored, or figure-8 self-supporting designs affect cost. Armored or figure-8 cables for outdoor aerial installation are more expensive due to additional steel strength members and crush-resistant sheaths .

• Environmental Rating: Outdoor PE jackets, UV resistance, and water-blocking systems increase material costs compared to indoor PVC or LSZH jackets .
Typical Pricing
• Wholesale bulk purchases: $0.09 to $1.52 per foot for standard fiber cables .

• Retail or pre-terminated assemblies: $1 to $6 per foot, with higher prices for armored or high-strand-count cables .

• 8-core specific examples: An 8-core GYTC8S figure-8 armored cable with steel-wire strength members and water-blocking system is designed for self-supporting aerial installation and falls within the higher end of this range due to its mechanical and environmental protections .
Summary

For an 8-core optical cable, the internal structure cost is influenced by fiber type, mechanical reinforcement, and environmental protection. Expect $0.50–$6 per foot for the cable materials alone, with armored or outdoor-rated figure-8 designs at the upper end of the range. This estimate excludes installation, connectors, or pre-terminated assemblies, which can further increase total costs .
