ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Singapore Fiber Optic Cable Splicing Price Inquiry

Overview

At Alpha Media Pte Ltd, we offer a range of fiber optic cable splicing services to meet your specific needs.

Key Takeaways

In Singapore, fiber optic fusion splicing typically costs between SGD 70–210 per splice, depending on project size, fiber type, and site conditions.Typical Pricing

For commercial projects, fusion splicing is the most common method and generally costs $50–$150 USD per splice, which converts roughly to SGD 70–210 per splice depending on exchange rates and local service provider pricing . This rate usually includes the labor for splicing and OTDR testing to verify each joint but may exclude materials such as splice closures, trays, or project management fees . Mechanical splicing, often used for temporary or emergency repairs, may be slightly cheaper but is less permanent and can have higher signal loss compared to fusion splicing .

Factors Affecting Cost
• Fiber Count and Volume: Larger projects with high fiber counts (e.g., 144-fiber cables) often benefit from volume discounts, reducing the per-splice cost .

• Site Conditions: Splicing in underground vaults or congested urban areas is more expensive than aerial splicing in open areas due to additional labor, safety, and equipment requirements .

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

• Fiber Type: Standard single-mode fibers are straightforward, while ribbon fibers require specialized mass fusion splicers, which can increase costs .

• Service Provider Expertise: Companies like Alpha Media Pte Ltd and Keydence in Singapore offer professional splicing services with advanced equipment, ensuring minimal signal loss and high-quality connections .

Local Service Options

• Alpha Media Pte Ltd: Offers both fusion and mechanical splicing with advanced testing and verification to ensure high-quality splices .

• Keydence: Provides customized fiber optic cabling solutions, including splicing, installation, and testing, tailored to project specifications and budgets .

• FS.com Singapore: Supplies splicing equipment such as fusion splicers, cleavers, and protection sleeves for network expansion .

Summary

For a typical fiber optic project in Singapore, expect SGD 70–210 per fusion splice, with costs influenced by fiber type, project size, site conditions, and service provider. Mechanical splicing is an alternative for temporary or emergency connections but may not offer the same long-term reliability. Always request volume pricing and detailed service quotes from local providers to get the most accurate estimate for your project .
