Solution SD-WAN Device SFP

Overview

Updated March, 2024 This document lists the official supported SFP modules for VMware SD-WAN Edge devices. It is designed to support a wide range of deployment needs—from small branch offices to large enterprise hubs—with detailed product specifications, licensing details, and deployment. This document offers a pre-validated design and deployment guide for Cisco SD-WAN using Cisco Secure Firewall Threat Defense and Cisco Secure Firewall Management Center. VMware SD-WAN significantly simplifies the WAN with zero-touch deployment, one-click business policy, enhanced firewall service, easy service insertion, and. The EC-S-P is a compact form factor thin edge branch gateway appliance that serves to build an SD-WAN fabric using Zero Touch Provisioning. It supports MPLS, 4G/5G/LTE, internet-based hybrid WAN datapath, and a control plane that is automated and secured by the HPE Aruba Networking EdgeConnect.
