TP-Link Fiber to Electrical Port Module

Overview

The latest tp-link tl-fc111a/114b fiber optic transceiver pair, launched in 2025, is a 100mbps fiber optic transceiver kit. It easily extends the distance of an existing gigabit network via fiber optic when integrated with the SFP Module. The MC220L applies the IEEE802. 3z. The MC200CM is a media converter designed to convert 1000BASE-SX fiber to 1000Base-T copper media or vice versa. Easy to Use Plug and play with. The TP-LINK MC220L media converter, after installing an SFP/MiniGBIC module, converts electrical signals (Ethernet data signal) coming via typical STP/UTP cable into modulated light signal transmitted via optical fiber. We offer SFPs and SFP+ transceivers for multimode 850nm, as well as for single mode 1310nm. These modules may be intended for different TP-Link series.
