ZITHA TECH SPECIALTY CABLES (Pty) Ltd

Thickened cable trays are available for customization

Overview

Custom Cable Trays | WireRun®That's why we now offer customization of our cable trays, on in individual basis or in bulk! Let us know exactly what you need.

Key Takeaways

Thickened cable trays are available and can be fully customized in dimensions, materials, and features to meet specific installation and load requirements.Customization Features

Thickened cable trays can be tailored to your project needs, including tray thickness, width, depth, and length. Customization extends to material selection, such as steel, aluminum, stainless steel, or fiberglass, depending on environmental conditions, corrosion resistance, and load-bearing requirements . Surface treatments like powder coating, galvanization, or painting are also available to enhance durability and protect against harsh conditions .

Specialized Design Options

Modern customized cable trays can include adjustable depths, modular connections, barriers, covers, and specialized wire supports. These features ensure proper cable separation, optimal airflow for heat dissipation, and easy access for maintenance or future modifications . Advanced CAD design allows precise routing and load capacity planning, ensuring the tray can support current and future cable loads .

Applications and Benefits

© 2026 ZITHA TECH SPECIALTY CABLES (Pty) Ltd - All rights reserved

Customized thickened cable trays are suitable for industrial facilities, data centers, commercial buildings, and outdoor installations. They provide enhanced structural strength, prevent cable damage, and improve organization. Tailored designs optimize space utilization, reduce installation time, and allow for future expansion without disrupting existing setups . Compliance with industry standards and safety regulations is ensured during the design and manufacturing process .

Summary

If your project requires reinforced or thickened cable trays, you can request fully customized solutions that match your specific dimensions, materials, and environmental needs. These systems offer superior durability, flexibility, and efficiency, making them ideal for complex or high-load cable management applications .
