View Huijue Core Switch

Overview

Optical modules are widely used in switches, network interface cards (NICs), routers, and other communication devices.

Key Takeaways

Huawei's Terra Series SST3200-12K-C is a high-performance Data Center Core (DDS) switch engineered for environments demanding extreme throughput and low latency. With its massive storage handling capability and advanced routing engine, it ensures seamless data flow even under peak. Optical modules are widely used in switches, network interface cards (NICs), routers, and other communication devices. During use, reading optical module information helps understand its real-time operating status, enabling faster troubleshooting of link abnormalities. Huawei switches already help customers achieve success in industries such as finance, Internet, retail, education.
