What are the specifications for pigtail channels

Overview

The pigtail sets are designed to operate over a wide range of wavelengths, ranging from 850nm to 1300nm for multi-mode and 1310nm to 1550nm for single-mode fiber with guaranteed low loss and reliability. Each pigtail is individually tested and supplied with a test certificate. High performance optical pigtails are a defining factor in ensuring any network performs to the highest level. Complies with the American Recovery and R anged Terminal Part Number Labor and Time Savin Flanged Spade and Ring Terminals ound. Standard and low loss Fiber Optic Pigtail Kits are ideal for fusion splicing the fiber connectivity required for structured cabling systems. Typical applications include data centers, Broadband CATV, Passive Optical Network PON, WDM or DWDM multiplexing, FTTh, and voice services in ATM and SONET. D-Link offers quality pigtails which are single ended with connectors.
